

MyCoast: New Jersey

Help Document our Changing Coast

MyCoast collects and analyzes photos of coastal events and places. Photos are linked to data about weather and tides to help understand coastal change.

How it Works

**You Add
Your Photo**

via the app or submit it when you get back to your computer.

**We Fetch
Background Data**

on weather and tides to add context to your photo.

**Your Report
Informs Decisions**

about responses to coastal change.
