MyCoast New York

VOLUNTEERS NEEDED!

Help document local flooding, storm impacts, and litter through community science

The MyCoast New York portal is used to collect and analyze photos of flooding, changing shorelines, hazardous weather, and litter impacts across New York's varied coasts and waterbodies.

Photos are linked to real-time environmental conditions to create reports that help emergency managers, local planners, residents, and state agencies understand our changing environment and make informed decisions.

REPORT TYPES

FLOOD WATCH - Tracking flooding across the state

STORM REPORTER - Documenting storm damage

LITTER WATCH - Documenting litter near water
